Notes:	<i>According to the source, percentages may not total 100 percent due to a small number of respondents who answered "Don't know."</i>

Description

Most respondents expected artificial intelligence (AI) to transform their organization and industry in the next one to three years, as of 2020, according to a global AI survey. Forty-three percent of respondents said that their organization will be transformed by the technology in that timespan, and 36 percent believed it to be the case for their industry.
